Re: Draft Supplemental Remedial Investigation Work Plan, Quality Assurance Plan Addendum and Health and Safety Plan, for the Asbestos Dump Site-Dietzman Tract, Operable Unit 3

Dear Mr. Kaup:

Enclosed is the Draft Supplemental Remedial Investigation Work Plan, Quality Assurance Plan Addendum and Health and Safety Plan, for the Asbestos Dump Site-Dietzman Tract, Operable Unit 3 which is located in the Great Swamp National Wildlife Refuge, New Jersey. Please review this document for its technical accuracy, viability for achieving work plan objectives, and compliance with applicable New Jersey standards and regulations.

As discussed in our April 30, 1991, telephone conversation the Asbestos Dump site, due to its large size, distance between areas of concern and complexity, has been split into separate operable units: the Millington site (Operable Unit 1), currently in Remedial Design; the White Bridge and New Vernon Road site (Operable Unit 2), in the Proposed Plan stage; and the Dietzman Tract site (Operable Unit 3), at the Remedial Investigation Work Plan stage. Please specify which Asbestos Dump site operable unit is being commented on in your correspondence to reduce any confusion.

ABD 001 1567

Due to the upcoming field season, and our desire to mobilize quickly, I am requesting your written comments by June 19, 1991. Any questions or comments on the attached draft work plan for Operable Unit 3 should be directed to me at 264-6695.

Your cooperation is greatly appreciated.

Sincerely Yours,

Lance R. Richman, P.G.
Remedial Project Manager
